Full Stack Developer with 2 years of experience building scalable web applications using Node.js, React.js, Express.js, PostgreSQL, MongoDB, and MySQL. Experienced in designing REST APIs, real-time applications with WebRTC and Socket.IO, ERP systems, and deploying production applications on Linux VPS using Nginx, PM2, Docker, and Cloudflare services.

Technical Skills

Languages: JavaScript, SQL

Backend: Node.js, Express.js, REST APIs, Socket.IO, WebRTC, Prisma ORM

Frontend: React.js, HTML, CSS, Bootstrap, jQuery, EJS

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: Linux, Nginx, PM2, Docker, Cloudflare Workers, Cloudflare R2, Cloudflare D1, Railway, MongoDB Atlas

Tools & Technologies: Git, GitHub, Puppeteer, TinyMCE

Professional Experience

Thinkersky Technology (Shipzy ERP)

Sep 2024 – Present

- Worked on a large-scale Import & Export ERP platform built with Node.js, JavaScript, EJS, jQuery, MySQL, managing 180+ relational database tables and modules including documentation, inventory, reports, ledgers, e-Invoice, e-Way Bill, eBRC, and other export compliance features.
- Developed and delivered 8+ customer-specific software variants by customizing workflows, business logic, forms, reports, and document templates to meet unique client requirements.
- Enhanced frontend performance by implementing lazy/on-demand initialization of Select2 and TinyMCE, optimizing API requests with client-side caching, and scaling product management forms from ~50 to 800+ products.
- Designed and developed 50+ export and legal document formats, creating responsive, client-specific document layouts while collaborating with the team to enhance production features and resolve complex issues.

Projects

JAM – Entertainment & Live Streaming Platform

Tech Stack: Node.js, Express.js, MongoDB, LiveKit, Docker, Linux VPS, PM2, Nginx, Cloudflare, Stripe, PayPal

- Developed backend APIs and administrative modules for a live streaming platform featuring video streaming, audio rooms, real-time messaging, virtual gifting, and payment management.
- Migrated the real-time communication infrastructure from Agora to a self-hosted LiveKit deployment, reducing monthly communication costs from ~\$500 to under \$100 while improving infrastructure control.

Pragyaan ERP

Tech Stack: React.js, Node.js, PostgreSQL, Prisma, TinyMCE, Puppeteer, Cloudflare R2, Linux VPS, PM2, Nginx

- Developed a full-stack ERP system featuring quotations, invoices, purchase orders, inventory management, GST reporting, profit & loss tracking, and business administration modules.
- Built a highly customizable quotation and document generation engine using TinyMCE and Puppeteer, enabling dynamic templates and professional PDF generation with secure storage on Cloudflare R2.
- Designed the complete application architecture, including database design, backend APIs, frontend, and production deployment on a self-managed Linux VPS.
- Managed production infrastructure, including Docker deployments, Linux VPS, Nginx, Cloudflare, SSL, and payment gateway integrations (Stripe, PayPal, and Google Play Billing).

Dairy Agent Mobile Application

Tech Stack: React Native, TypeScript, Node.js, PostgreSQL, Prisma ORM, PM2, Nginx, Linux VPS

- Developed a full-stack mobile application for dairy distributors to manage customer orders, deliveries, invoices, collections, profit tracking, and business reports.
- Implemented role-based workflows with multi-account switching, shift-wise order management, driver delivery tracking, and customer self-service features.
- Deployed and maintained the application on a self-managed Linux VPS using PM2 and Nginx.

Pedhi ERP – Gujarat Market Yard Management System

Tech Stack: React.js, Node.js, PostgreSQL, Prisma ORM, Puppeteer, Queue System, Linux VPS, PM2, Nginx

- Developed a domain-specific ERP for Gujarat agricultural market yards, managing farmer–customer agreements, billing, payments, GST workflows, and financial reporting.
- Implemented high-volume transaction processing with a queue-based architecture, automated PDF generation, and optimized workflows for large-scale agricultural operations.
- Built business-specific features including multi-bill PDF generation, advance settlement management, intelligent GST handling, and inventory-related transaction processing.

Random Chat – WebRTC Video & Voice Chat Platform

Tech Stack: React.js, Node.js, WebRTC, Socket.IO, Express.js, JavaScript, Railway, MongoDB Atlas

- Developed a real-time random chat platform supporting video calls, voice calls, and instant messaging using WebRTC and Socket.IO.
- Implemented random user matching with an in-memory matchmaking system, reducing database dependency and enabling faster peer connections.
- Built real-time features including signaling, camera/microphone controls, and session-based messaging, with deployment on Railway and MongoDB Atlas.

Image Scheduler – Serverless Content Scheduling System

Tech Stack: Cloudflare Workers, Cloudflare D1 (SQLite), React.js, JavaScript

- Developed a serverless content scheduling system with a React-based admin panel to manage image publishing by date and category.
- Built a custom calendar scheduler with drag-and-select workflows for organizing and automating image display.
- Implemented a scalable backend using Cloudflare Workers and Cloudflare D1, enabling a low-cost, maintenance-free deployment.

Real-Time Multiplayer Game Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.IO

- Developed real-time multiplayer games, including a number guessing game and a color prediction game, using Socket.IO for low-latency communication and synchronized gameplay.
- Built an optimized game engine with room management, event-driven architecture, and server-side game logic to ensure fair result processing and efficient real-time state synchronization.
- Designed scalable backend services with MongoDB for game sessions, player data, and live game management while optimizing Socket.IO event handling for high-performance gameplay.

Education

Government Engineering College, Rajkot

Bachelor of Engineering (B.E.) – Computer Engineering

2025
